

S U M M A R Y

From a young age, Jaadyn has been immersed in the world of theatre through stage performance and production. Through this, their passion for the arts persisted and soon moved into taking on roles of leadership for excelling creative projects. Many of their ideas come into fruition from vivid imagination and joy of storytelling. The process of curating an idea or message through a still image takes them further into their appreciation for the art. They are most vocal on how they have consistently transformed individuals into representations of specific events and memories. By attempting to leave a perennial mark on their viewers, Jaadyn strives to create a platform where "different" is appreciated.

E X P E R I E N C E
